REMARKS/ARGUMENTS

RECORD OF TELEPHONE INTERVIEW

The undersigned had a telephone interview with Examiner Vincent Nguyen on September 22, 2004 in which the examiner indicated that the application is allowable, but that several informalities need to be addressed.

A replacement ABSTRACT directed to the invention of this divisional application was requested. A replacement ABSTRACT is enclosed herewith on a separate page. No new matter has been added, since the replacement ABSTRACT corresponds to the claims in this application.

Revision of Figure 2 was requested; more particularly the legends indicated in the above AMENDMENTS TO THE DRAWINGS section were requested to be added to Figure 2, except that "signal processing" was requested to be added to item 50, while SIGNAL PROCESSING SYSTEM has been added to item 50, to conform to the specification.

No other matters presently pending before the United States Patent and Trademark Office were discussed.

Conclusion

Applicant understands that the replacement ABSTRACT and replacement FIGURE 2 will be entered by Examiner's Amendment, and the application will then be, in all respect, in condition for allowance. A notice to that effect is respectfully requested.

Respectfully Submitted,
JEFFERY E. THOMSEN
